SCS-104 Receiver Line Card
November 2012

Version 101 Software Update

SCS-104 Version 101 (10/08/12) software is now available for download on the DMP Dealer Direct Website at http://dmp.com/dealer.

Effective 11/2/12, all SCS-104 Receiver Line Cards are being manufactured with Version 101 (10/08/12) software. The updated software will begin shipping as current stock is depleted and is estimated to occur in early December 2012.

Updated Operation

Line Card Programming

The SCS-104 Receiver Line Card now correctly applies network line programming changes from the SCS-150 processor. Previously, if Network Line Enable was set to YES, and then changed to NO to turn off network operation, the SCS-104 would continue to receive network messages until the line card power was cycled.

This issue did not occur for digital dialer programming of the SCS-104 Line Card.

Note: Both the SCS-104 and SCS-150 must be updated for this change to take effect. Please see Technical Update TU-0660 for SCS-150 details.

Obtaining the New Software

SCS-104 software updates are available for download free of charge on the DMP Dealer Direct Website at http://dmp.com/dealer.

The SCS-104 can be updated using Remote Link Version 1.61 or higher and a Model 399 Programming Cable. See the SCS-104 Installation Sheet (LT-1204) for more information.
