SCS-1R Printer Terminator Plug

Note: UL central station applications must use a serial printer listed for Fire Protective Signaling Applications.

When installing an SCS-1R without a printer, use a Printer Terminator Plug to avoid receiving the following print error message.

Activity Log Error - See Operations Manual.

1. There are two DB-25 pin connectors on the SCS-1R rear convenience panel.

2. Firmly press the printer terminator plug into the ACTIVITY LOG DB-25 pin connector.
