

Version 6.42.11 Update

Effective January 12, 2023, the Virtual Keypad app for iOS is updated to Version 6.42.11.

Features

Critical Alerts Support

Virtual Keypad now supports critical alerts for iOS. This feature is only available for iOS versions 12 and higher.

This feature allows an alarm notification to override any Do Not Disturb settings and appear on the user's home screen.

To enable this feature in Virtual Keypad, complete the following steps:

1. Update the Virtual Keypad app.
2. Open the Virtual Keypad app.
3. When prompted, enable critical alerts. Or, navigate to Virtual Keypad's Notifications settings in iOS Settings to enable this feature.

Obtaining the New Software

This Virtual Keypad app update is available for download, free of charge, from the App Store®.
