XV Gateways

with AlarmVision™

XV-24

XV-60

XV-96

INTRODUCING ALARMVISION FROM DMP

AlarmVision turns existing cameras into smart motion detectors with the addition of one, easy-to-use XV Gateway. Adding this one product to an IP camera system turns those simple cameras into powerful alarm detection devices.

BENEFITS

REAL EVENTS

- Define **where** you want to detect activity within a camera's field of view.
- Specify **what** activity you want to detect - person, vehicle and/or animal.
- Schedule **when** detection of that activity should trigger a response.

REAL TIME

Add real time analytic monitoring to your customers' existing camera installations.

REAL RESPONSE

Cameras become smart motion detectors able to trigger actions and alarms, the same way an intrusion sensor would.

REDUCE FALSE ALARMS

AlarmVision™ monitoring reduces false alarm fees with cross zoning and video detection. Instead of alerts about moving leaves, shadows and light, receive notifications about people, vehicles or animals.

REMOTE PROGRAMMING THROUGH A SINGLE INTERFACE

- Program cameras, analytics and panel zones with one interface: Dealer Admin™.
- Easy, quick remote setup and maintenance reduces labor and truck rolls.
- Existing systems do not require changes to existing camera installations.

XV GATEWAYS

- Turn your customers' existing cameras into smart motion detectors, ensuring their property is being actively monitored.
- Add cameras to your existing systems to enhance security.
- Choose the integrated video solution that gives you the power to monitor real events in real time with a real response.
- Seamlessly integrate with Immix in a few simple steps, making deployment of your XV Gateways easier than ever.

SECURITY YOU CAN COUNT ON

- **XV Gateway to Panel**
  If the external network goes down, the XV Gateway and all connected cameras continue to communicate with the XR panel via internal network.
- **Panel to Monitoring Center**
  Even if external network drops, the XR panel's back up cell can ensure nonstop alarm communication to the monitoring center and end user, so your customers are always protected.

MODELS	XV-24	XV-60	XV-96
Processing	24 MP	60 MP	96 MP
Network Connection	Single NIC	Dual NIC	Dual NIC
Detection Regions	Up to 4 per camera	Up to 4 per camera	Up to 4 per camera
Internal Storage	1 TB	4 TB	4 TB
Connection to Panel	XR Series	XR Series	XR Series
Analytics	Loitering, person, vehicle and animal detection	Loitering, person, vehicle and animal detection	Loitering, person, vehicle and animal detection

All models are NDAA compliant and support ONVIF and RTSP cameras.
